A Convention of Spiritualists.

The second annual convention of the National Spiritualists' Association will be held in this city, beginning to-morrow and continuing three days. Delegates from a majority of the States will be in attendance, and a very busy session is anticipated. Many prominent Spiritualists are already in the city, and others are arriving on each train. The members of the board of trustees are on the ground, and are hard at work making preparations for the convention.

The progress of the cause during the past year in the several States will be shown, and business relating to the propagandism of Spiritualism during the coming year will be transacted. The evenings of each day will be devoted to expository philosophical lectures on the subject of spiritualism, given by the ablest speakers in the ranks. These lectures will be preceded by platform tests, affording proof of the continuity of life, and the meaning of these tests to the world will be explained by the speakers following their presentation.

In view of the fact that many of the intelligent people of Washington are Spiritualists, this convention will be watched with considerable interest.
